Vertical Wire Bracket 2-Side

The vertical cable management system can be mounted to the sides of standard EIA 19-inch racks or between two adjacent racks. These versatile components can be used for multimedia applications including TUP, ScTP, coax and fiber optic cables. The vertical cable management system is excellent for use in Cat5e, Cat6, Cat6A, and fiber optic cabling applications. The unique design helps maintain proper cable bend radius. Cables are accessible, so additions and changes are easier than ever before.

Features:

- Height: 36"
- Width: 4"
- Slotted Channel: (2) 4" x 4"
- Color: Black
- Eliminates clutter on patch panel racks by routing cables.
- Single and dual sided panels are available.
- Cable can be routed on the front and back of the racks for patch and station cables.
- Routes all types of wire and cable including coaxial cables, fiber optic and ScTP.
- Accommodates standard 19" rack mounting.
- Flexible "fingers" allow cords to enter and exit the cable management panel as needed.
- Channels open for easy installation.
- Standard EIA 310 D
